

## About APEX

### CUTTING TOOLS, SAW BLADES AND MACHINERY FOR SAW BLADE MAINTENANCE

#### Tools and high precision machinery

Created in 1996, APEX is a French company specialized in cutting tools for the first and the second woodworking industry. The company is implanted in the center of a dynamic Rhône Alpes region where toolings and mechanical industries are predominant. APEX's specialities are the tooling and the machines for the maintenance of the band saw blades and the circular saw blades. Regarding tooling, one of the main products of APEX are the circular saw blades, capable to cut wood but also aluminum and metal, wood derivatives as laminated, melaminated, fibre board, etc... Another speciality of the company are the band saw blades. They are used for different applications, it can be wood in the sawmilling industry with log cutting saw blades, or in the carpentry industry for resawing or piercing. Our band saw blades are also used for the plastic industry, synthetic materials, tissue, foam, textile... even in the food industry with special blades for meat, fish or other deep-frozen products. Finally, APEX has a complete range of band saw blades for metal, in diverse types as M42 or M51. The rest of our tooling range is made up of diverse innovating tools like inclinable cutter-heads, planing helical cutter-heads, sectional cutter-heads, multi-profile cutters and cutter-heads and several tools with hydraulic tightening. The CNC tooling is also well presented thanks to our range of diamond drills, carbide monobloc cutter, many cutter-heads with cylindrical shank and a whole range of drill holder, spindles and cutter spindles. You will also find in reversible knives, planer knives, profiled knives and diverse accessories such as stellite, cork or grinding wheels. The second APEX speciality are the machines for the maintenance of : -Band saw blades : the range is made up of sharpening, setting, stellite-tipping, welding, side grinding and levelling machines, for band saws between 60 to 311 mm width. -for circular saw blades : the range is complete because we start with semi-automatic machine and can provide automatic and hydraulic sharpening machines, CNC or even in a cycle entirely automated which permits to sharpen a whole circular saw without the intervention of any operator. In addition to its sales on the national market, APEX exports also its products to more than 30 countries worldwide. For any further information you need, do not hesitate to contact us. See you soon. APEX France.
